

Regulation and Compliance Support

At **EcoLogix**, we take pride in helping our clients succeed. Let our understanding and experience make your business more manageable and successful.

EcoLogix Group personnel as a group have decades of environmental regulatory and compliance experience assisting federal, state and local government agencies, businesses and non-profit agencies. Whether you are running an agency or business, making improvements to your facilities or planning a major new project, environmental considerations will be of concern to your neighbors and regulatory agencies. The experienced staff of EcoLogix Group will help you understand what is needed, evaluate options, develop the best strategies and work with environmental regulatory authorities and neighboring communities to achieve your objectives, strengthen community relations, restore and protect the environment, all at the same time.

Developing the Best Environmental Solution

The keys to a successful environmental solution are a thorough understanding of the complex scientific, technical, environmental regulatory and social issues, and sometimes, the willingness and ability of your team to consider and effectively evaluate new approaches for successful operations of facilities or projects.

EcoLogix Can Immediately Bring These Critical Capabilities to Your Team

- Evaluation of regulatory requirements and identification of the best approaches for achieving your objectives quickly and efficiently.
- Development of innovative solutions and technologies to more cost-effectively improve the environment and meet regulatory and permit requirements.
- Identification of grant funding opportunities.
- Development of comprehensive plans to complete projects on schedule and on budget.
- Identification and development of strong relationships with communities and agencies to understand their requirements and concerns and work with them pro-actively to smooth the path forward.
- Guidance through permit application, approval, and renewal.
- Technical support to achieve and maintain permit compliance effectively and efficiently.
- Development of strategies for minimizing costly delays in operations and project implementation.
- Analysis and evaluation of how new or revised regulations may impact your business.
- Review and negotiation of draft consent orders and other enforcement actions to assure goals are achievable and reasonable.

About EcoLogix Group

EcoLogix Group is an environmental strategy firm helping clients achieve challenging organizational and project goals.

We specialize in managing real and perceived impacts to air, land, water, and people from operational practices and physical development projects, incorporating solutions that appropriately respond to concerns in ways that save our clients time and money, while producing better project outcomes. Our team has vast experience in helping seaports successfully address air quality impacts and other environmental concerns associated with port activity and associated goods movement.
