

Environmental Litigation Support

At **EcoLogix**, we take pride in helping our clients succeed. Let our understanding and experience make your business more manageable and successful. EcoLogix Group personnel have advanced academic credentials and decades of environmental regulatory and compliance experience working with federal, state and local government agencies, businesses and non-profit agencies. If your organization is facing complex environmental legal challenges, EcoLogix can help. The experienced staff at EcoLogix have faced many different types of environmental challenges and can provide you and your legal staff with expert advice and opinions on a wide range of environmental issues.

- Environmental data review and analysis, including surface and groundwater quality, air quality, hazardous and solid waste characterization.
- Review of permits, inspection reports, enforcement orders, proposed consent decrees and similar documents to explain the specific details and assist our client's legal counsel in developing strategies for negotiations with regulatory authorities to obtain realistic and cost-effective solutions.
- Assisting client's legal counsel with document review and development of effective strategies to address environmental litigation issues.
- Reviewing data, documents, preparing expert testimony, critiquing opposing expert testimony and preparing for depositions related to:
 - environmental data and contaminant analysis for water, air, land and waste management
 - water appropriations and aquifer recharge
 - drinking water source protection
 - municipal and industrial wastewater and stormwater discharges
 - Total Maximum Daily Load (TMDL) requirements
 - land use requirements and water and sewer designations
 - aquaculture, waterway, shoreline and wetland construction and restoration
 - dredging, dredged material management and siting of containment facilities
 - solid waste management planning, facility review, analysis of materials management alternatives and recommendations for appropriate best management practices.
 - contaminant exposure pathways with the potential to result in human exposure
 - development of strategies and technical options for contaminated site restoration
 - Federal and State regulatory requirements under the National Environmental Policy Act, Endangered Species Act, Section 404 of the Clean Water Act and Section 10 of the Rivers and Harbors Act

EcoLogix maintains strong working relationships with federal, state and local agencies, environmental groups, and communities, providing immediate credibility for your agency, business, facility or project. We bring an in-depth understanding of complex scientific, technical and regulatory issues and are experts in coordinating and communicating effectively with legal professionals and regulatory agency personnel to ensure your success.
